

STATEMENT OF PURPOSE

RS21610

The proposed legislation updates the definition of two terms used in the Idaho Veterinary Practice Act. The definition of a "certified euthanasia technician" is being reformatted for clarity purposes and an archaic and dangerous provision authorizing persons trained in euthanasia methods prior to December 31, 1992 to become certified is being removed as contrary to public health and safety. The definition of a "veterinary technician" is receiving a non-substantive correction to reflect a name change for a national association.

FISCAL NOTE

This bill has no fiscal impact.
